

Rugged Cases

An incredible light structural foam resin shell always looks new, and is unaffected by dents, scratches or corrosion. Inside, prescored "Pick N Pluck" foam or padded dividers protect even the most sensitive equipment.

Rugged Cases are sized for every need. Rugged Cases meet and far exceed the highest standards of industrial, airline, military and commercial applications. Originally designed for and currently used in numerous abusive applications by the US Armed Forces and NATO, Rugged Cases provide no-nonsense hard knocks protection coverage for on-the-job situations, regardless of the hazards of transportation, handling and site conditions.

Cases feature an exclusive 1/4" neoprene O-ring, to guarantee a perfect seal to a depth of 30 feet. Neither dust nor water can penetrate this barrier, keeping your equipment safe. The O-ring is easily replaced if damaged.

Extra Thick Wall Construction - Made of unbreakable lightweight space age resin

E Z Purge Valve - All cases are absolutely airtight. The exclusive built-in O-ring sealed pressure purge valve allows for quick equalisation after changes in altitude or temperature.

Large Ergonomically Designed Handles - Moulded in, with massive locking latches for absolute security.
